

Update on Science Fair Projects

Hello ODE Science Families,

I wanted to give you an update on the class and on our Science Fair projects for the Grand Finale.

The students are enjoying doing a variety of experiments. Friday we experimented with magnets, next week we will continue this exploration.

I have had some questions about the projects. Most of the classes will be doing class projects during class time. (The Dragons have decided to do a combination of class and individual projects.) The students will show off their projects at the Grand Finale on Friday, May 31st.

I am letting the classes lead the way, with some guidance from me. I will let you know if they need to do any work at home.

Thank you,

Kathy Galassini
