

One Day Enrichment Elementary Art
Syllabus Session 4
Lauren Feece

In this last session of One Day Enrichment Art the focus is on Mentoring Self Directed Projects. Students will use what they have learned over the year and apply it to projects of their choosing. Each week we will focus on a two part class. The first part of class is dedicated to a thought experiment developed to increase connection between logic and creativity. After this exercise students are given the opportunity to explore art making with the materials available to them. This exploration will be guided by a project outline but also students will have the ability to chose a self directed project. The focus of this course is on building the student's confidence through independent thinking and creative problem solving.

Week 1
Creative visualization
Directed Project Work Time: Robots

Week 2
Creative visualization
Directed Project Work Time: Robots

Week 3
Creative visualization
Directed Project Work Time: Painting Process

Week 4
Creative visualization
Directed Project Work Time: Painting Process

Week 5
Creative visualization
Directed Project Work Time: Drawing Negative Space

Week 6
Creative visualization
Directed Project Work Time: Drawing Negative Space

Week 7
Creative visualization
Directed Project Work Time: Community Collage

Week 8
Creative visualization
Directed Project Work Time: Community Collage
